Skidmore College  
Mannix Marketing Inc  
Niche Concepts, LLC

**Web Programmer**, 2013-Present  
**Web Applications Developer**, 2008-2013  
**Web Programmer / Video Editor**, 2005 - 2008

### Recent Project Highlights:

- **Web Services:** Using a combination of XML and Web Services to send a set of data to a web service and then parse the return XML to display a set of data. Also set up a web service so that data can be entered into a database.
- **Payment Gateway API:** Use technical documents to integrate online payment processing for product payment, donations, or membership dues. Payment Gateways include Paypal, Authorize.net, TransFirst and Heartland.
- **Wordpress:** Setup Wordpress environment so that client has ability to edit their site in an easy and efficient manner. Creating of templates from PSDs provided by Graphic Designers.
- **eCommerce:** Setting up of various eCommerce shopping carts to suit client's needs. Shopping carts include, SiteDirector, osCommerce, VP-ASP, WooCommerce and custom applications.
- **PCI Compliance:** Working with Security Metrics PCI scan, resolve issues with code or server related vulnerabilities to get a site and server up to PCI compliance.
- **Custom Application Development:** determine needs, develop a plan of action through a written proposal and/or flow chart, coding, testing and successfully launch live application.
